

LEISUREDRIVE RENAULT RENOIR

During the 80's and 90's our fantastic Renoir campervan proved to be a massive hit with hundreds of happy customers. Due to popular demand we knew it was the right time to reintroduce this classic camper with a new modern design and based on the popular Renault Traffic van. It has already turned out to be extremely popular.

Utilising Leisuredrive's traditional side layout kitchen installed along the driver's side of the van and two rear forward-facing seats the Renoir affords plenty of internal space.

The kitchen handmade and installed at Leisuredrive comes complete with a Webasto 60L fridge freezer and a Dometic double burner hob with integrated electric pump sink unit covered neatly with a toughened glass lid.

The Renoir comes complete with rear seats which make up a double bed 6' x 4' in size providing outstanding comfort. They are available in a large range of beautiful upholstery, leather or a mix. The front passenger seat with optional swivel base enables easy access to a free-standing stow away dining table and comes fitted with an under seat safe as standard. All our seats are fitted with fully STATUS crash tested three-point seat belts

The Renoir utilises a front lift elevating roof, easy to use and offering plenty of stand height.

The interior is lit by a range of independent lighting options including strip lights at the sides and rear doors, touch spot lights and reading lights at the front if required.

Numerous plugs sockets with integrated USB adapters to charge your devices are placed around the interior.

We use only the finest sheep wool insulation for warmth and sound proofing and blackout blinds on all the windows to give you complete privacy and an excellent night's sleep.

The Renoir has numerous optional extras including but not limited to A TV and reception, Webasto Diesel heater an awning and Bike rack.

All our new campervans come with our two-year warranty, warranty and RAC roadside mechanical assistance.
